POWER PUMP - Is a weight-based group-fitness program. Is the ideal workout for anyone looking to get lean, toned and fit – fast. Using light to moderate weights with lots of repetition, POWER PUMP gives you a total body workout. Instructors will coach you through the scientifically-backed moves.

CRUNCHFLOW - It focuses on every minor muscle in the core and the movements these muscles are responsible for. This is not the typical core workout where you're just cranking out tons of crunches or holding a plank for 5 minutes. The focus is on the lower ab muscles first before working your way up, you'll work your entire body with balanced poses, working on the rest of your body, plus a great needed stretch.

INDOOR CYCLING –is a challenging cardio workout, in which you can do a complete session at long and/or high intensity by increasing and decreasing the resistance on your bike. It improves your endurance. In addition, the various sitting and standing exercises ensure that you are constantly working your leg muscles and core.

CORE & MORE – With the use of a Physio-Ball, insuring every part of the core is challenged. It also ties in upper body strength movements to give a great challenge, yet well rounded low impact.

BURN - A great workout for both cardiovascular conditioning and muscular strength building utilizing some equipment.

FUNCTIONAL TRAINING - A strength training that readies your body for daily activities. These exercises equip you for the most important type of physical fitness, the kind that preps you for real-life, daily living stuff like bending, twisting, lifting, loading, pushing, pulling and squatting with or without the use of equipment.

You'll use just the barre (or equivalent like a countertop or chair back) and your body weight to churn out rep after rep of muscle-burning move, while others incorporate tools like resistance bands, sliders, free weights & exercise balls,

MINDFUL HATHA YOGA - This yoga class offers guidance through classic hatha yoga poses, offering students time to refine the postures and coordinate them with their breath.
